

JPanel

main.java.Tile

main.java.Customers

```
classDiagram
    class JPanel
    class mainjavaTile["main.java.Tile"]
    class mainjavaCustomers["main.java.Customers"]
    mainjavaCustomers --> JPanel
    mainjavaCustomers --> mainjavaTile
```

The diagram illustrates a class hierarchy where 'main.java.Customers' is the superclass. It has two subclasses: 'JPanel' and 'main.java.Tile'. This is represented by a horizontal line from 'main.java.Customers' that branches into two vertical lines, each ending in an upward-pointing arrow that connects to the respective subclass box.
